who we are

builders

We engineer scalable software from the ground up, shipping MVPs fast and platforms built to grow.

educators

We train developers, designers and product thinkers across Africa through cohorts and mentorship.

pioneers

We work at the intersection of technology and impact, building for overlooked markets.

industries & stack

Experience in the industries

- PropTech and real estate
- Fintech and investment research
- Healthcare and pharmacy
- Food and agriculture
- Music, media and creators
- Community and non-profit
- Web3 and blockchain
- eCommerce and luxury retail
- Home services
- Social and dating
- InsureTech
- Developer tools and education

and growing

How we build

MERN Stack	React / Next.js	TypeScript
React Native / Expo	Node.js / Express	Python
PHP / MySQL	REST & GraphQL APIs	SOAP & XML Services
PostgreSQL / Prisma	MongoDB / Redis	Firebase
AWS (EC2, S3)	Docker / Terraform	CI/CD Pipelines
Solidity / Foundry	Chainlink & dApps	Stripe / Paystack / Flutterwave
OpenAI & LLM APIs	Figma	Jest / Sentry

Robust and flexible: we pick the stack each project demands. Fully remote, working with clients wherever they are.

services

product & UX design

From first sketch to tested prototype, we map the journeys, design the interfaces and hand developers a system they can build from.

Product Discovery

User Journeys

UX/UI Design

Prototyping

Design Systems

Visual Identity

web development

Fast, animated, conversion-focused websites and web apps, engineered to scale, not just to launch.

Landing Pages

Web Applications

eCommerce

Admin Dashboards

Motion & Interaction

Hosting & Maintenance

services

mobile development

Cross-platform iOS and Android apps built with React Native, from the first build to store release and beyond.

iOS & Android Apps
React Native / Expo
Payments & Wallets

Real-time Features
Store Release
Post-launch Support

AI & automation

We put AI to work inside your business: agents, chat automation and integrations that save hours every week.

AI Agents & Assistants
Workflow Automation
Chat & DM Automation

LLM Integrations
Data Pipelines
Internal Tools

services

blockchain & Web3

Smart contracts, dApps and on-chain products built to be transparent, secure and auditable.

Smart Contracts

dApps & Wallets

Prize Pools & Tokens

On-chain Voting

Oracles & Chainlink

Contract Testing

project management

Clear plans, steady communication and on-time delivery. We run projects end to end so you always know where things stand.

Discovery & Scoping

Agile Sprints

Timelines & Milestones

Stakeholder Updates

QA & Release

Remote Team Delivery

services

product strategy

We help founders decide what to build first, how to launch it and how to grow it, before a line of code is written.

selected work

HomeFairyTech

HomeFairyTech is a property rental platform that helps owners find verified agents, manage bookings and receive payments securely through escrow, with full transparency on every deal.

homefairytech.com ↗
[see case](#) ↗

Services	Product Design Mobile Development Backend & Payments Landing Website
Industries	PropTech Fintech
Year	2025-2026
Challenge	To build a two-sided rental marketplace for owners, agents and tenants where money moves safely (rent held in escrow, payouts, refunds and recurring billing) in a market where trust is the biggest barrier.
What we did	• Built the iOS and Android app with React Native and Expo • Engineered the Node.js, Prisma and PostgreSQL backend • Delivered full Flutterwave payments: virtual accounts, withdrawals, refunds and recurring billing • Secured cards with AES-256-GCM tokenisation, PIN/3DS and double-charge protection • Launched the landing site and waitlist
Status	Live on Google Play

OnePercentNow

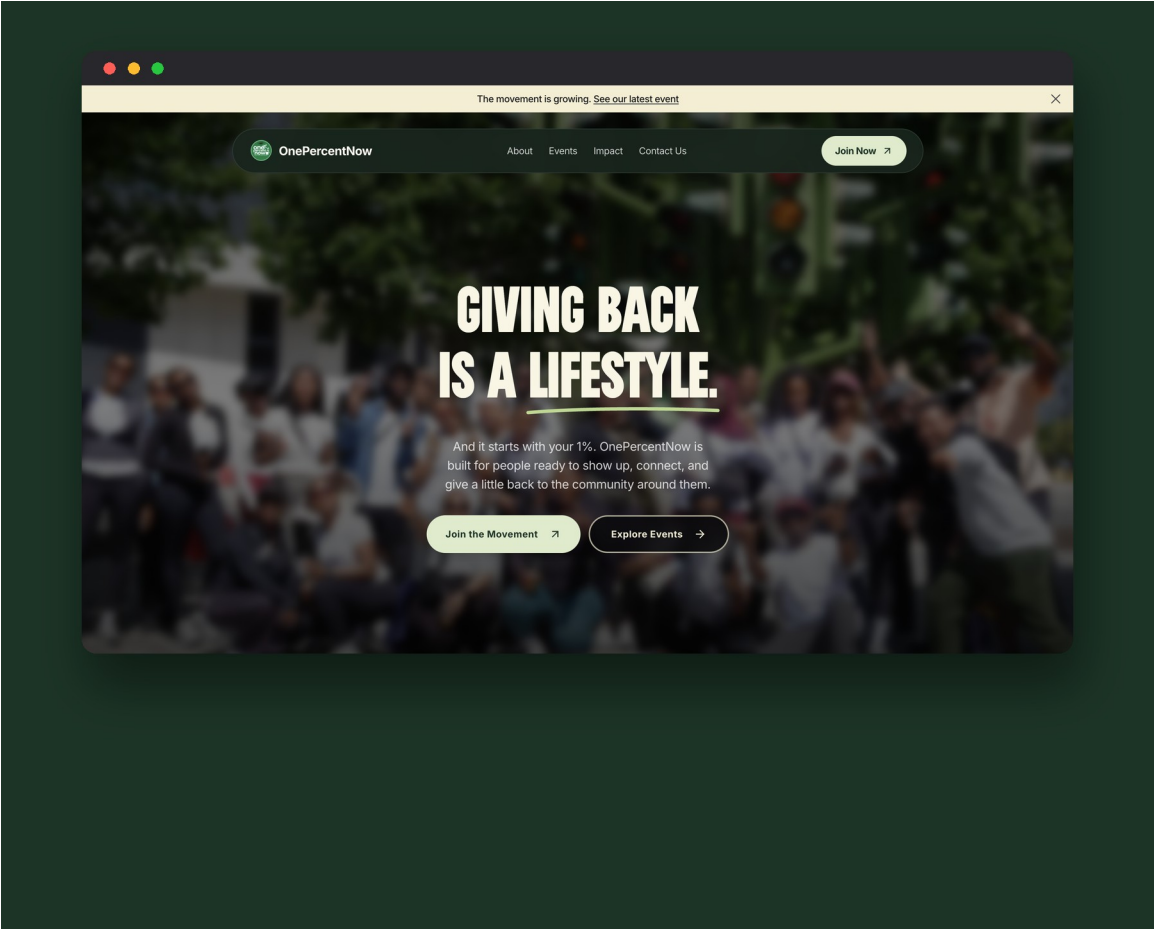

OnePercentNow is a community movement built on people, connection and giving back, and it starts with your 1%.

onepercentnow.net

[see case](#)

Services	Web Design Web Development Payments Integration
Industries	Community & Non-profit Events
Year	2026
Challenge	To give a fast-growing movement a home online that feels as warm as its events, and make it effortless for people to join, register and donate from anywhere.

- What we did
- Designed and built the community website
 - Created a bold, photo-led hero and a live announcement bar for the latest events
 - Built registration and donation forms for the "10K Steps for Our Girls" charity walk
 - Integrated Paystack and Stripe for local and international payments

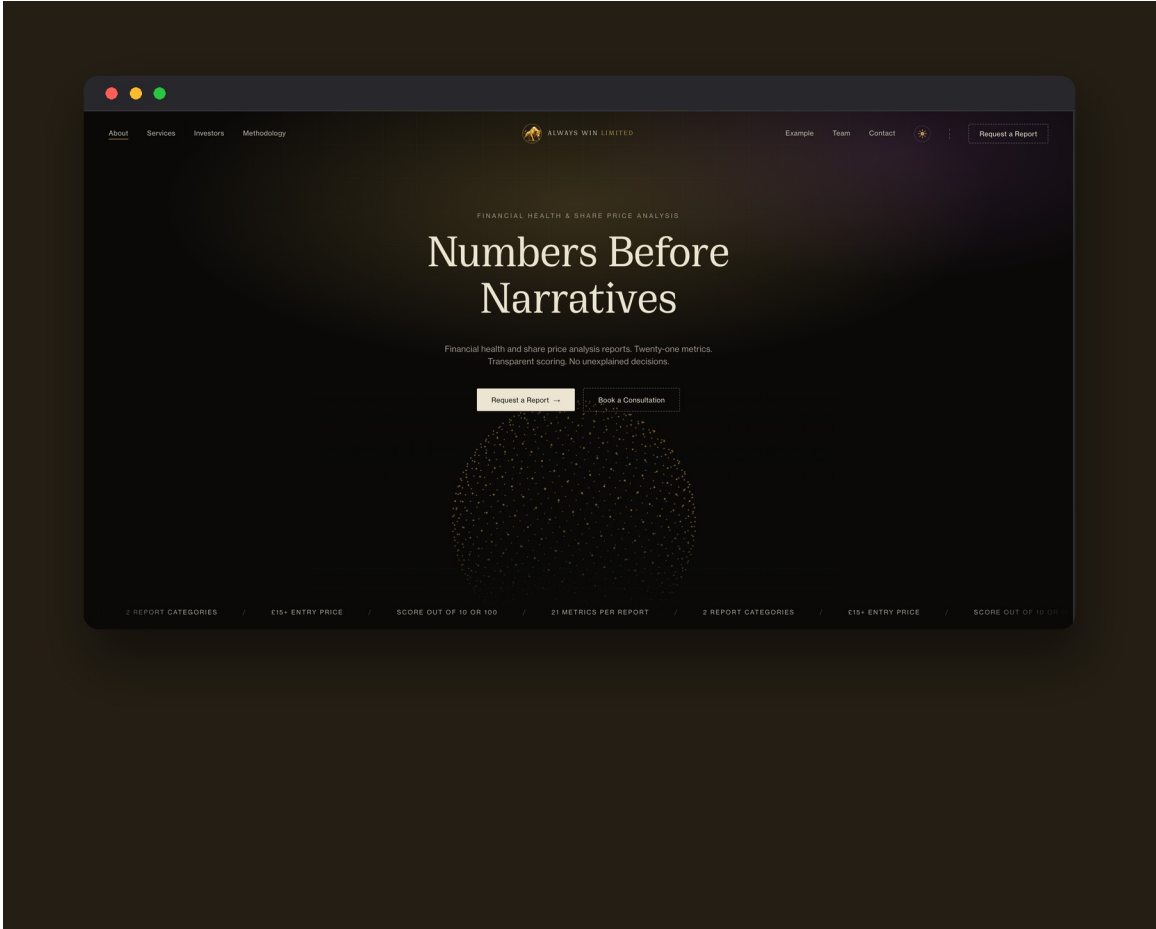

Always Win Limited

Always Win Limited publishes financial-health and share-price analysis reports: twenty-one metrics, transparent scoring and no unexplained decisions.

alwayswinlimited.com ↗
[see case](#) ↗

Services	Web Design Web Development Motion Design
Industries	Fintech Investment Research
Year	2026
Challenge	To present a numbers-first research product with the calm credibility of a private bank, while making it simple for investors to request a report or book a consultation.
What we did	- Designed a dark, editorial interface with serif typography and gold accents - Built an animated particle-sphere hero and a scrolling key-facts ticker - Structured services, methodology, example report and team pages - Added a light/dark theme switch and report-request and consultation flows

Milton Keynes Guitar

A performance-first website for a working guitarist offering lessons, songwriting and session work. Rooted in blues, built without limits.

miltonkeynesguitar.com ↗
[see case](#) ↗

Services	Web Design Web Development Motion Design
Industries	Music Education
Year	2026
Challenge	To capture more than a decade of musicianship in a site that feels like a live show, and turn visitors into booked intro lessons.
What we did	- Designed a dark, stage-lit hero with a 3D guitar and oversized type - Created an animated string motif and vertical side caption - Built a floating pill navigation for Lessons, Songwriting and Sessions - Focused the page on a single clear call to action: book a free intro lesson

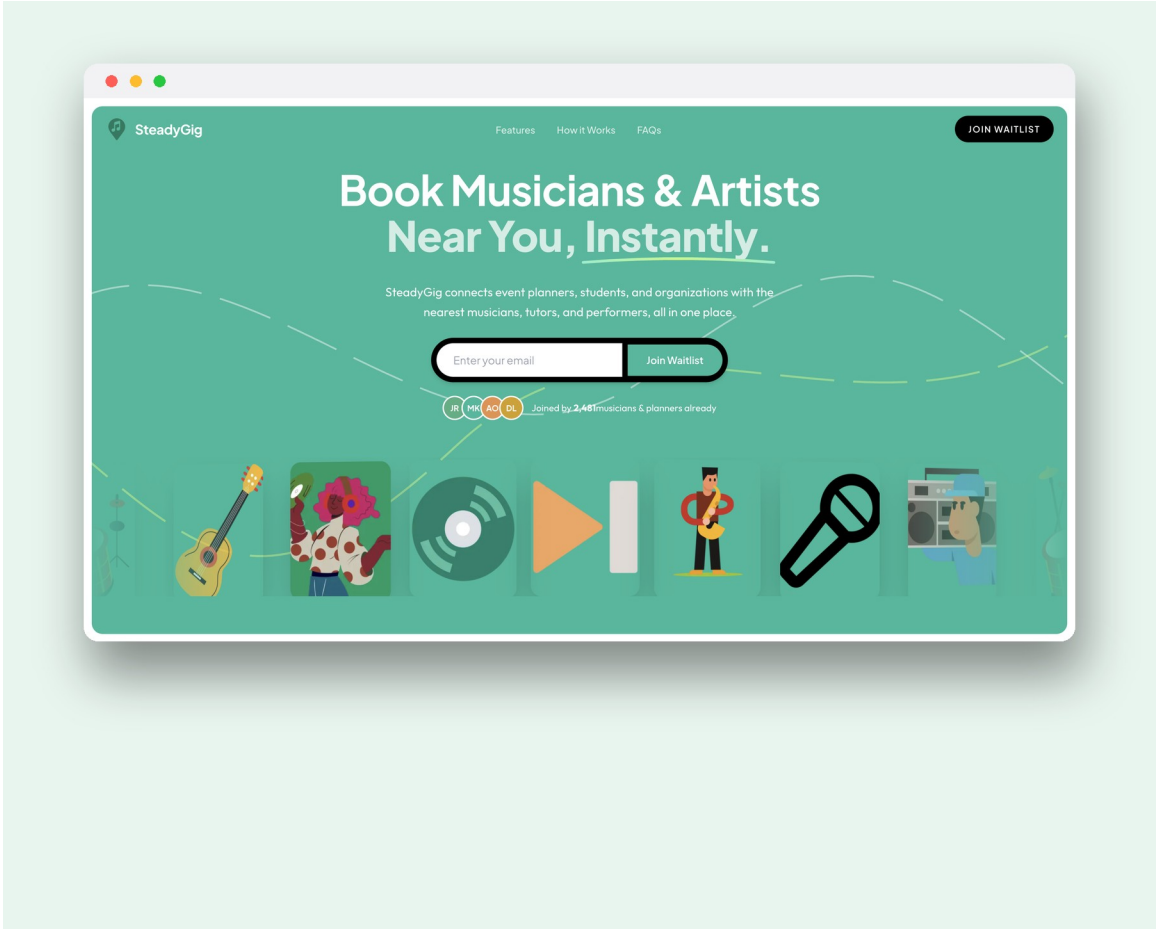

SteadyGig

SteadyGig connects event planners, students and organisations with the nearest musicians, tutors and performers, all in one place. An in-house Create With Tech product.

steadygig.xyz ↗
[see case](#) ↗

Services	Product Strategy Brand & Illustration Product Design Web App Development
Industries	Gig Economy Music & Entertainment
Year	2023 to present
Challenge	To make booking local talent as easy as ordering a ride, while giving musicians, tutors and artists a steady stream of verified work.
What we did	- Defined the marketplace model for planners and performers - Designed a playful, illustrated brand and landing page - Launched a waitlist to build demand ahead of release - Building the web app: discovery, profiles and booking
Status	In active development

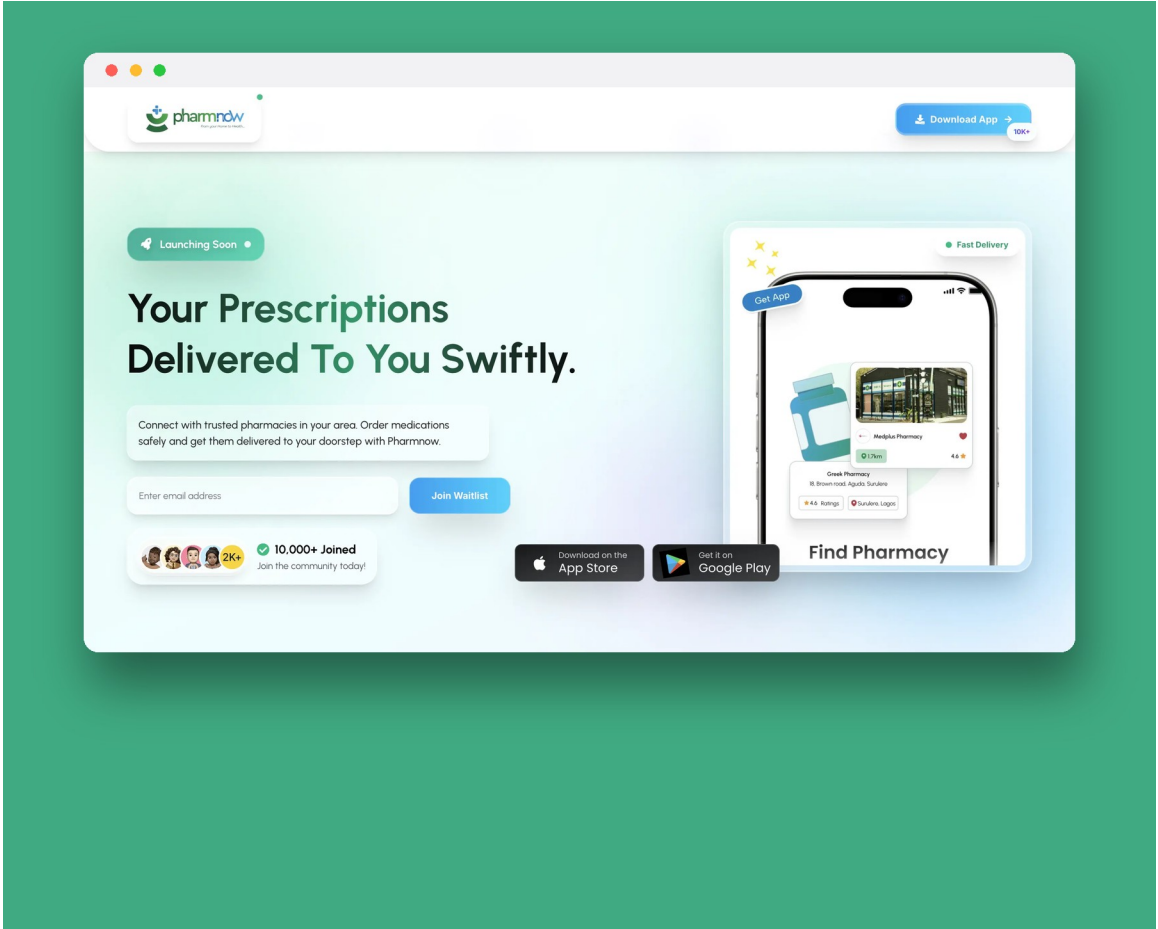

PharmNow

PharmNow connects people with trusted pharmacies in their area to order genuine medications safely and get them delivered to their doorstep.

pharmnow.health ↗
[see case](#) ↗

Services	Product Design Mobile Development Landing Website
Industries	Healthcare Pharmacy & Delivery
Year	2023 to present
Challenge	To build trust in ordering medication online (verified pharmacies, clear locations and ratings) while keeping the ordering experience fast and simple.
What we did	- Designed the mobile experience: pharmacy discovery by distance, ratings and favourites - Built the pre-launch landing site with waitlist and App Store / Google Play links - Created a fresh, clinical-but-friendly visual language in greens and blues

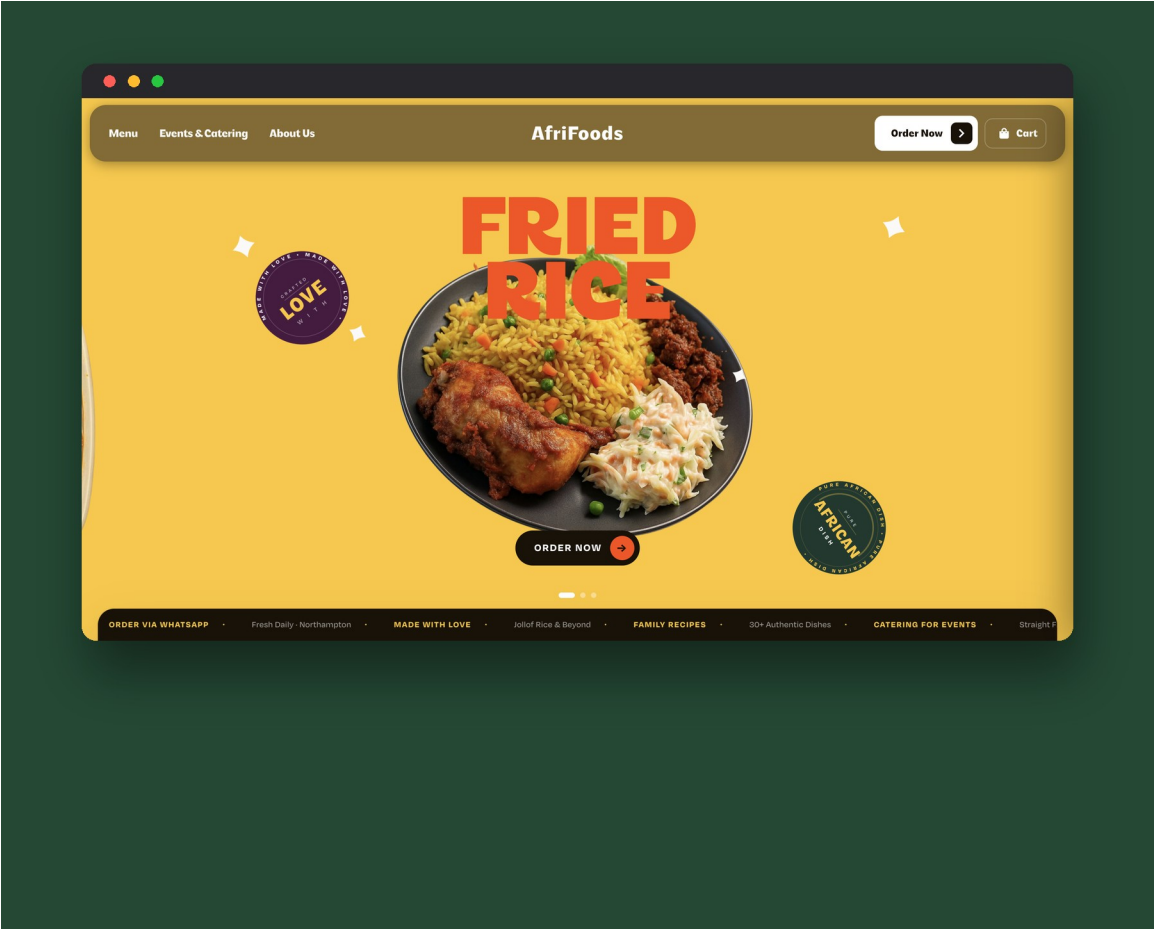

AfriFoods

Authentic West African dishes,
cooked fresh daily in Northampton
and delivered straight to your door.

afrifoods.xyz

[see case](#)

Services	Web Design eCommerce Development
Industries	Food & Drink eCommerce
Year	2023
Challenge	To bring the colour and warmth of West African home cooking online, and make ordering as easy as sending a WhatsApp message.
What we did	- Designed a bold, food-first hero carousel with oversized type and badges - Built the menu, cart and ordering flow - Added WhatsApp ordering and events & catering enquiries - Created a scrolling brand ticker to carry key messages

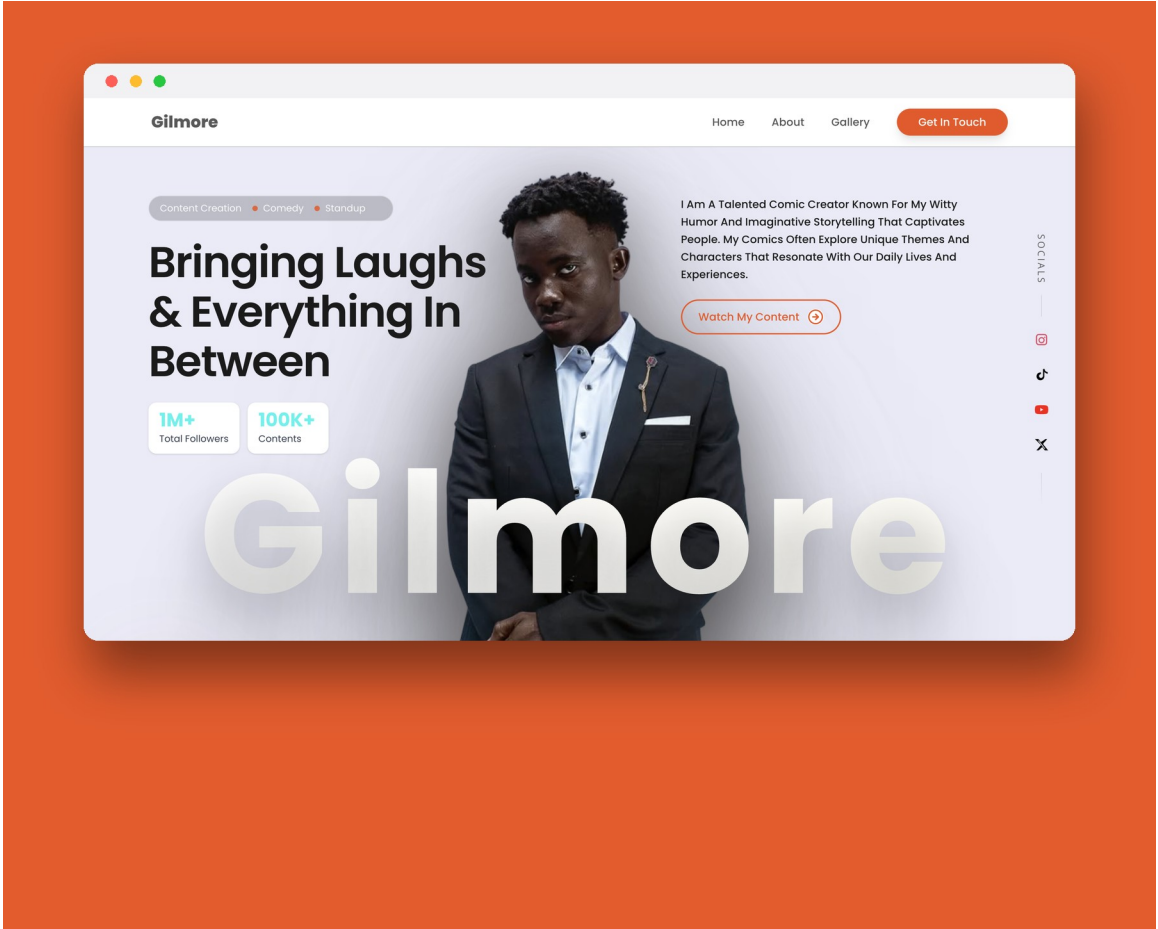

Gilmore

A GSAP-animated single-page portfolio for a comedy content creator, bringing laughs and everything in between.

[see case ↗](#)

Services	Web Design Web Development Motion Design
Industries	Entertainment & Media Creator Economy
Year	2025
Challenge	To give a creator’s personality a proper stage (playful, bold and fast) and route fans to the content and brands to bookings.

- What we did
- Designed a single-page layout with oversized name type behind a cut-out portrait
 - Built scroll and entrance animations with GSAP
 - Added audience stats cards and a vertical socials rail
 - Clear “Get in touch” and “Watch my content” calls to action

more work

A selection of other products we have designed and built across Web3, social, home services and agriculture.
